

RAPSEL AN ITALIAN COMPANY THAT SPEAKS THE GLOBAL LANGUAGE OF ARCHITECTURE AND DESIGN...

MORE THAN 30 YEARS IN DESIGN

From the very beginning, in the 70s, Rapsel carried forward its creative belief with consistency and determination. The company's policy is to operate in the area of contemporary design, identifying objects with highly innovative content and great quality of aesthetics and form. Research is the basis of all projects. The interior design collections is addressed to a sophisticated public consisting of opinion leaders and consumers who lead to a stylish life and have good taste. Rapsel's trend setting objects have great character and in some cases they have even been described as 'cult objects' of design. These have

become essential reference points in the evolution of the way of living and its models. Just to give a very obvious example, the design approaches like those of Starck and Shiro Kuramata, although very different and distant from each other, co-exist harmoniously in Rapsel's catalogue. In fact, through the selection of the single projects, the real identity of the company emerges and becomes stronger. However these are not only objects of interior design and mere appearance, but they are functional and from the technical point of view perfectly made. They are a tangible sign of what the future of domestic design is going to be.

PATRIZIA
SCARZELLA

She is an authority in design,
Architect and journalist, communication expert,
Author of books and international design
exhibitions. Co-founder and Vice President of
DComeDesign Association.

RAPSEL'S STORY

Intermediary between vision and reality research, innovation and audacity - these three driving forces have characterized Rapsel since it's inception in 1975, turning it into one of the leading companies in interior design. Teamed with skilled use of new materials and technologies, unceasing research focusing on function, design and aesthetics has led to a steady flow of revolutionary products. The Rapsel product range is characterized by authenticity and originality. Design icons by leaders on the international scene are featured alongside innovative objects by newcomers to whom Rapsel offers a passport into the world of architecture and design.

80's

RAPSEL: an Italian Company that speaks the global language of architecture and design

90's

The ability for Rapsel to work closely with architects and designers, allowing their style and vision, coupled with Rapsel's flexibility and unique ability to work on individual custom pieces, provide the optimal solution to respond to design and function.

2000's

Blazing a path for new trends, Rapsel has, over the last 30 years, shared in the evolution of modern living. Its new and avant-garde products include, Matteo Thun, Marco Piva and Adri Hazebroek designs. All are sensational designs charged with emotion which transport the beholder into exciting new worlds that dreams are made of...
